- Talk to the organization team

So who is
that Lady?

What's she doing
with that apple?

Can we
trust her?

Who can we
trust at all?

“Reality”

- Privacy is mostly gone
- We lose control of our data
- We depend on machines, systems and databases
- While fighting the war we need to adapt to reality
- And it is all about trust

Trust

- Trust is takes a long time to establish but can be destroyed in a millisecond
- Trust needs both openeness and discretion
- Trust is the absence of fear
- Trust creates security
- We need more of this stuff

Keynote

John-Perry Barlow
