

DocMan
collaborative document management

Chaos Communication Camp 2011

August 13, 2011

Features

- Multi user document management (in a web browser)
- Supports text, audio, video, word, powerpoint, excel and every other file format
- Hierarchical organized in semester, categories and courses
- Integrated lecturer profiles including course overview
- Fancy tag cloud generation for easy overview about common topics
- Full text search and PDF full text indexing
- If possible, preview image with content of the document

Features

- Download document in original file format or as .zip file
- Comments and rating for every document uploaded
- Revision system for documents (Download any revision at any time)
- Multi language software (Currently English and German translation available)
- .. many more translations possible due to the fact that DocMan is open source :)
- Email subscriptions for whole courses and single documents
- SSL secured connection during the whole flight!

Snapshot

The screenshot shows a web browser window with the address bar displaying `https://docman.me`. The page title is "DocMan • Overview". The main content area features the DocMan logo and navigation links: Overview, Full Text Search, Tag Cloud, My Account, and Logout. A language selector is set to German. The "Overview" section includes a welcome message and a "Latest Uploads" list with five items, each showing a file icon, name, size, and upload date. Below this is a "Vorlesungen" section with a sub-section for "Einführung und relationales Paradigma" by Martin Davis, listing three related files.
