

Funding opportunities for hacking on privacy

- Nlnet is non-typical funding agency:
 - Private money
 - Short and lightweight application (just pitch your idea in 1-2 pages, 'go' within weeks)
 - 100% funding

Projects we are already funding or have funded:

- TOR
- Freenet
- GNUUnet
- Parrot
- Noscript
- Anomos
- CAcert
- Mailman-SLSS
- Turtle

What can we fund

- Projects up to 30.000 euro
- Bigger projects when necessary and really good/important
- Out of pocket costs for hardware, travel, etc.
- Writing or improving code
- Doing research/proof of concept
- (well actually anything and everything that helps our goals – remember, its private money)

What is likely to be funded

Network related research:

- Communication protocols
 - Jabber/XMPP, SIP, SIP SIMPLE, RTT
- Routing protocols
- Overlay networks
- Browser security etc.

Two special themes:

- Identity, privacy and presence
 - Security and confidentiality of realtime communication
- Open Document Formats
 - Important for stability of the internet
